2/14/75

Dear Harold,

The enclosed check is for a copy of Whitewash IV.

I have several articles on the Dick Gregory "evidence" and should be getting others in the mail pretty soon. As soon as I can get them all copied I'll send them.

Finally all the research I've been doing on the Warren Report is going to prove useful. I have to do a major research paper for my Evidence class on some fact-finding commission. At first the instructor wasn't to thrilled with the idea of me doing it on the Warren Commission. He said that every year there are a handful of nuts in the class who feel compelled to take shots at the commission without really having done any objective research. As a result he has found it useful to interview everyone about their papers to see if they're at all "qualified" to write about the subject they've chosen. I was in his office an hour explaining that I didn't plan to do a paper filled with speculations and theories, but a critical analysis of the commissions procedures and the resulting "credibility gap". I guess I convinced him that I'm not a nut because he gave me the O.K. on the paper.

I've got my fingers crossed for the Ray decision.

Best,

Karen
